Fiber Evolution flies to NY

After being shown in Cologne, Stockholm, Vienna (see photo), the Fiber Evolution event comes to New York for the ICFF, the International Contemporary Furniture Fair (May 17-20). Fiber Evolution, a project by Marc Sadler, communicates the particular vocation shared by all Foscarini lamps to be used, even in multiple compositions, to characterize spaces in contract environments.

Lux 9, preview in Frankfurt

Issue number 9 of Lux magazine, published by Foscarini, is dedicated to the theme of irony in design. The magazine was presented at a preview on April 7 at the Museum of Applied Arts in Frankfurt during Luminale – the festival of lighting culture – which featured a debate conducted by a panel of experts. The scenography of the event was magnificent, thanks to the setting up of the museum by Vicente Garcia Jimenez, that included an installation of the new Tropico project by designer Giulio Iacchetti.

Genesis Foscarini, Milano

During design week in Milan, Foscarini presented the 'Genesis Foscarini' project at Superstudio Più, to narrate the thoughts and emotions that lead to the conception of each new lamp model, each with its own personality, history, development process. The presentation included the new additions to the Twiggy series by Marc Sadler, with the XL table lamp and reading lamp, the new decorative pattern on Wagashi Wires – Luca Nichetto and Massimo Gardone, in addition to the new Tropico concept – Giulio Iacchetti.
